

mPOS Itos Terminal

First steps

Contents of this guide

- Get to know your device
- Installing the application
- Getting started
- Bluetooth synchronisation
- Mobile POS functionalities

Get to know your device

S/N The serial number is located on the back of the device.

Switch it off when not needed

Installing the application

To download the mPOS Redsys application, scan the QR code with your smartphone or tablet.

Alternatively, you can also download it by **accessing Google Play or AppStore** on your device.

Getting Started

Switch on the device by pressing the **POWER** button.

When the logo of your Financial Entity is displayed on the screen, the device is operational and you can synchronise it via **BLUETOOTH** with your Smartphone.

Bluetooth synchronisation

1. Activate **Bluetooth** on your **smartphone** and select the serial number (S/N) of your mPOS.
2. Accept the Bluetooth connection: **First on the ITOS by pressing the OK BUTTON. Then on the Smartphone by pressing ACCEPT,** and both will be permanently paired, ready to use the application.

Mobile POS functionalities

With the mPOS Redsys app, you can charge your clients **both in cash or by card**. You can also consult the transactions carried out at any time and make the necessary refunds from the detail of a transaction.

-->**For cash payments**, no login is required. Enter the amount you receive from your client and the application will show the amount to be refunded.

-->**Only Android**

For card payments, you must enter the bluetooth identifier of your pinpad in the configuration menu.

--> Once you have selected the "Card" payment mode and entered an amount, you can make a sale by connecting your mobile device and your pinpad. At the end of the transaction you can send the purchase receipt by email or SMS (abbreviated).

--> With "Paygold" you can send a payment request to your client and he/she will make the payment from his/her own phone. You can send the request to an email, to a phone or by scanning a QR code.
