Getting to know the device

Band reader

Display LCD

Micro-usb port

Keyboard

Card reader Chip

S/N the serial number can be found on the back of the device.

Switch it off when not needed

Installing the application

To download the mPOS Redsys application, scan the QR code with your smartphone or tablet.

Alternatively, you can also download it by **accessing Google Play or AppStore** on your device.

Getting Started

Switch on the device by pressing the **POWER** button.

When the logo of your Financial Entity is displayed on the screen, the device is operational and you can synchronise it with your **Smartphone via BLUETOOTH**.

Bluetooth synchronisation

1. Activate **Bluetooth on your smartphone** and select the serial number (S/N) of your mPOS.

2. Accept the Bluetooth connection: **First on the VERIFONE by pressing the GREEN BUTTON.** Then **on the Smartphone by pressing ACCEPT**, and both will be permanently paired, ready to use the application.

Mobile POS functionalities

With the mPOS Redsys app, you will be able to charge your clients **both in cash and by card.** You will also be able to consult the operations carried out at any time and make the necessary refunds from the details of an operation.

-->For cash collections no login is required. Enter the amount you receive from your client and the application will display the amount to be returned.

-->Only Android
For card payments, you must enter the bluetooth identifier of your pinpad in the configuration menu.

-->Selecting "Card" payment mode after entering an amount, you can make a sale by connecting your mobile device and your pinpad. At the end of the transaction, you can send your purchase receipt by email or SMS (abbreviated).

--> With "Paygold" you can send a payment request to your client and he/she will make the payment from his/her own phone. You can send the request to an email, to a phone or by scanning a QR code.
